

Summary of the Consolidated Afloat Network and Enterprise Network Services (CANES) Initial Implementation and Action message. CNO message DTG 071927ZDEC09

This message assigns actions to organizations and personnel who may field, own, operate or maintain shipboard system and applications that could possibly touch and or use the consolidated Afloat Network Enterprise Services (CANES) and Common Computing Environment (CCE) infrastructure.

All Afloat Systems and Applications that require internal and external connectivity of afloat units must participate in the CANES implementation process to ensure as a minimum these systems and application will continue to provide required capabilities after initial CANES implementation.

All systems and applications that will touch or use CANES/CCE infrastructure must be approved by the CANES Oversight Board (CORB) and certified via the PEO C4I Application Integration process prior to ship board installation.

For a copy of the complete naval message and/or information on the Application Integration (AI) Process and Certification deadlines, please send email to canesinfo@navy.mil.
